

Q1. Create an external table in the default database on data orders which has order id, customer id and order date.

```
CREATE EXTERNAL TABLE default.orders (  
    order_id INT,  
    customer_id INT,  
    order_date TIMESTAMP  
)  
ROW FORMAT DELIMITED  
FIELDS TERMINATED BY ','
```

Q2- Create a Hive or Impala table on data in the training materials 'base_stations.tsvt' . (Hint: Load the data directly on the table)

1- Manually import/upload the file from local to hdfs

2- CREATE EXTERNAL TABLE default.base_stations (

```
    station_num INT,  
    zipcode string,  
    city string,  
    state string,  
    latitude float,  
    longitude float  
)  
ROW FORMAT DELIMITED  
FIELDS TERMINATED BY '\t'  
LOCATION '/user/training/data'
```

Q3. Using Sqoop import the customerservicerep table directly in hive metastore.

```
sqoop import --connect jdbc:mysql://localhost/loudacre --username training --password training  
--table customerservicerep --hive-import
```

Q4. Use Sqoop to import only first_name , last_name , and city from table customers in AVRO format on HDFS. Create an external Hive/Impala table on it.

```
sqoop import --connect jdbc:mysql://localhost/loudacre --username training --password training  
--table accounts --columns "first_name,last_name,city" --target-dir accounts_avro --as-avrodatafile
```

```
accounts_avro (  
    first_name STRING,  
    last_name STRING,  
    city STRING  
)  
STORED AS AVRO  
LOCATION '/user/training/accounts_avro'  
TBLPROPERTIES ('avro.schema.url'='/user/training/accounts.avsc')
```

Q5. Use Visualizations on basestations table in Mysql . Save the results in CSV or XLS format.

file uploaded as visualisation-results.csv

Q6. Create a table directly from the metastore.
